

# Virtual Events

Organize impressive virtual and hybrid events with the versatile event platform Virtual Events\* and wow your online attendees with unparalleled streaming quality and interactive engagement features.

- ✓ Event creation in under 10 minutes
- ✓ Integrate 50+ apps
- ✓ 100% personalizable

## Virtual Networking

Chats, individual meetings, and a match-making feature offer the same networking options that you would have in person. Your attendees can create their own profiles and network amongst themselves.

## Easy & Quick Setup

You can create an impressive event in a matter of minutes, even without having technical experience. The platform assists you along the way by mapping the entire event journey: from creation, to invitation management, to final analysis.

## Customizable Design and Features

Personalize the event platform to reflect your company's corporate design and tailor the various features to suit your needs.

## Interactive Tools boost Engagement

Live polls and the option to integrate whiteboards and other interactive tools promote the engagement of your attendees.

## Your Events: Now Virtual!

### Conferences & Exhibitions

Impress your audience with on-stage presentations and give your attendees room to network.

### Team Events

Organize your team events easily online and make it possible for all your employees to come together – wherever they are.

### Employee Gatherings

Bring your employees up to date on current results, discuss quarterly goals, or plan new projects together.

### Workshops

Promote your team's creativity. Poll and whiteboard tools allow attendees to interact and create space for new, off-the-cuff ideas.

### Training

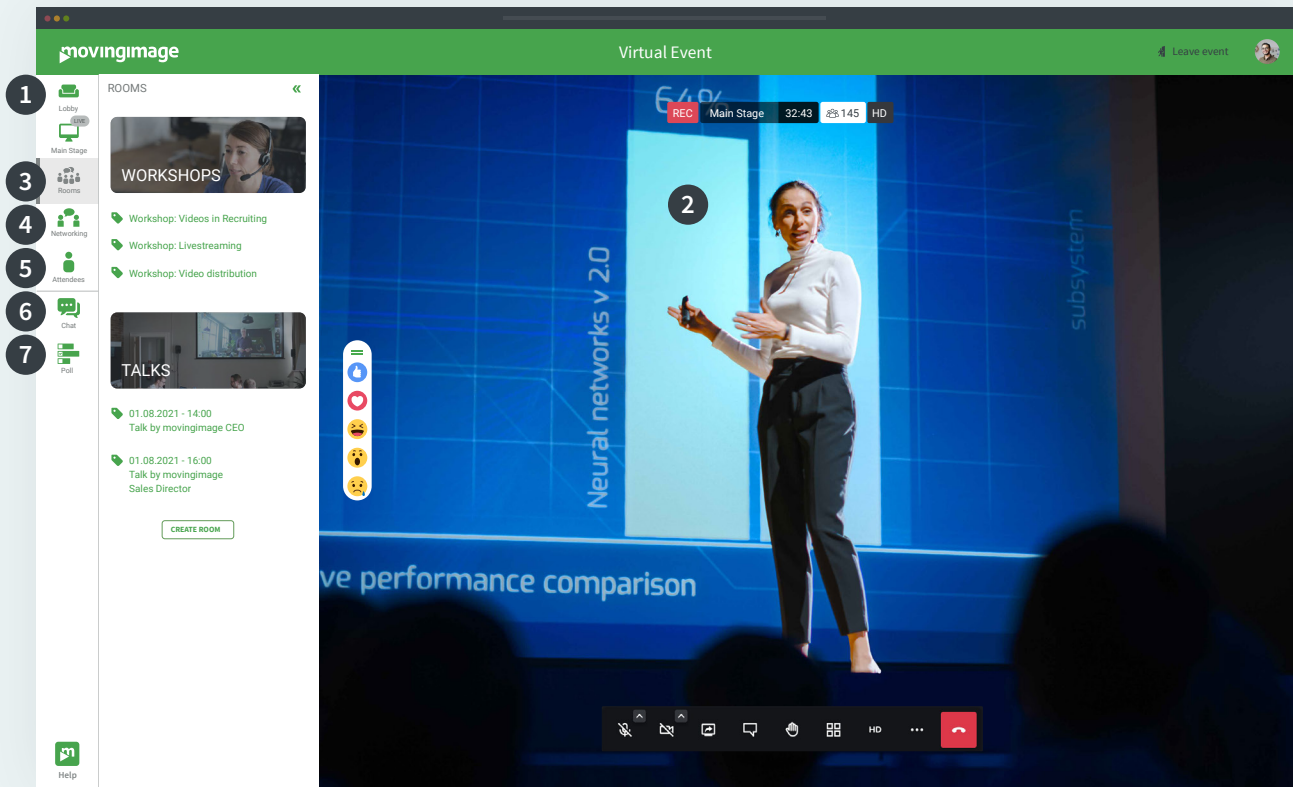

Train your staff and give their careers a boost. Interactive areas and integrations help create a motivational environment.

### Hybrid Events

Supplement your in-person event by streaming it on the virtual platform at the same time.

# Features

## 1 Lobby

Present the agenda, information about the speaker, or your sponsors' logo.

## 2 Main Stage

Here, viewers can follow the speeches, presentations, and discussions.

## 3 Rooms

This is where small groups can come to exchange ideas and information, network, or collaborate.

## 4 Networking

Viewers can network and have virtual one-on-one conversations.

## 5 Attendees

Attendees can filter who they have conversations with according to various criteria.

## 6 Global Chat

You can communicate with all of the attendees and give them general information using the chat feature.

## 7 Polls

Set up live polls and let your audience make their decisions in real time.

## Web Conferences

You can even incorporate the webcast and systems such as Zoom.

## Whiteboards and Tools

Web applications, photos, videos, and tools can be integrated into the stream.
